EDUCATION

B.E. (Hons.), Chemical
BITS Pilani, Pilani Campus ⬏
2014 - 2019

M.Sc. (Hons.), Chemistry
BITS Pilani, Pilani Campus ⬏
2014 - 2019

SKILLS

Angular   Javascript/Typescript   Node.js   React   MongoDB   Mongoose   Stripe   Checkout   Axcess

AWS Lambda   AWS serverless   Java   SQL/postgres   Git/Github   Spring Boot   Jenkins   HTML   CSS

CI/CD

WORK EXPERIENCE

Senior Software Engineer (Ticombo)
Project: Ticombo main & admin website ⬏

08/2020 - Present   *Berlin, Germany (Remote)*
Ticombo is the first Ticket Marketplace where Organizers, Resellers and Fans can buy and sell tickets in a fair, easy and secure way

- Developed completely new functionality for events creation and it's related entities from scratch for both admin and main website
- Developed features related to ticket system which involved multiple delivery methods
- Developed **APIs** and **Cron workers** in AWS serverless framework and various UI & UX features using **Angular** framework
- Implemented **timezone** in entire website and migrated the old data to make it consistent
- Implemented two external vendors api integrations **tixstock** and **logitix** in the system
- Developed **external APIs** which are exposed to 3rd parties for integration
- Migrated the payment flow of **stripe** integration to newer stripe elements
- Worked on refactoring the **payment module** code to create generic solution for implementing multiple payment gateways
- Worked on integrating **checkout** and **axcess** payment gateways into the system

Full Stack Developer (Societe Generale)
Project: Solstis

09/2020 - 09/2021   *Bangalore, India*
To have one single access point to all kinds of data(official data, non official, RA, valuations, market data...) for major risk engines to make client connectivity easier and cheaper through Distribution webservice

- Developed the monitoring system module from scratch based on **ELK stack** for the project and implemented **multithreading** to the module to make it more efficient using executor framework
- Helped in production support and solved the previous errors & problems existed in non-production environment
- Developed a UI portal using **React** for all the modules and information related to project
- **Purged** data in production database to *improve application performance*

WORK EXPERIENCE

Full Stack Developer (Societe Generale)
Project: Data Quality Hub (DQHub)

06/2019 - 08/2020   *Bangalore, India*

To bring data to consumers the right level of data quality and make them trust the data they receive. To create a virtuous circle where data issues are detected and remediated upstream so that progressively the data quality improves until the right level is achieved

- Migrated entire dashboard module from old implementation to **react** based framework which *improved performance* and user experience
- Developed various widgets (**preact** based widget framework) with the best possible user experience
- Developed the **REST APIs** with the **Spring Boot** framework with **Postgres** DB
- Handled the **production deployment** and issues
